PROFESSIONAL SUMMARY

Backend Developer Intern candidate with hands-on experience building REST APIs using Python, Django, and Django REST Framework. Skilled in PostgreSQL, JWT authentication, Docker, and Git/GitHub. Built a documented, query-optimized expense management API and delivered two live production websites.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, REST API Design, JWT Authentication, Permissions, Service-Layer Architecture

Database: PostgreSQL, SQL, Database Relationships, Query Optimization, `select_related`, `prefetch_related`

Tools: Git, GitHub, Docker, Docker Compose, Redis, Celery, Postman, REST Client

API & Debugging: OpenAPI/Swagger, drf-spectacular, Django Silk, API Testing, N+1 Query Analysis

Frontend (Basic): React.js, Tailwind CSS

PROJECTS

Expense Splitter REST API | Django, DRF, PostgreSQL, JWT, Docker, Redis, Celery

GitHub: <https://github.com/Habib-1/expense-splitter-api>

- Built a backend API for group expense management with authentication, group membership, role-based permissions, expense CRUD, expense sharing, and settlement calculations.
- Designed service-layer business logic to separate expense-splitting and settlement rules from API views.
- Implemented JWT authentication and custom permissions for group members and administrators.
- Containerized the environment with Docker Compose and PostgreSQL; integrated Redis/Celery for background workflows.
- Documented APIs with OpenAPI/Swagger; tested endpoints with Postman and REST Client.
- Debugged and optimized slow endpoints: profiled queries with Django Silk and fixed N+1 patterns using `select_related()` and `prefetch_related()`.

CuroSoft - Smart Healthcare Management System | DRF, React, PostgreSQL, Tailwind

Backend: github.com/Habib-1/CuroSoft-Backend | Frontend: github.com/Habib-1/CuroSoft-frontend

- Built a full-stack healthcare platform with an ML-based doctor suggestion system.
- Implemented JWT authentication, role-based profiles, appointment scheduling, and prescription download.
- Created patient and doctor dashboards for reports, appointments, and prescription management.

EXPERIENCE

E-commerce Web Application (Client Project)

Live: bongoshoes.com | Stack: Django, DRF, PostgreSQL, React

- Developed and maintained REST APIs for product, cart, checkout, and order management for a live client store.
- Implemented JWT authentication, email notifications.
- Integrated the API with a React frontend for product browsing, cart operations, and order placement.

The Chronify - Online News Portal | Django Templates, PostgreSQL

Live: thechronify.com

- Developed a dynamic news portal with category filtering, breaking news, trending posts, search, and SEO-friendly article pages.
- Built an admin workflow for managing news, authors, and categories, with responsive UI and performance optimization.

EDUCATION

Bachelor of Science in Computer Science & Engineering - Northern University Bangladesh | [Expected Dec 2026]

Relevant Coursework: Data Structures, Algorithms, Database Systems, OOP, Software Engineering.

ADDITIONAL LEARNING

Currently learning CI/CD, automated testing, clean architecture, and API optimization for scalable applications.
